

## QueuePro Assembly Instructions

With the base cover in place screw the post onto the base. Make sure the post is screwed down as tightly as possible.

### HINT

To make sure the post does not loosen with the base 'touch tight' turn upside down and using a wrench or socket on an electric drill fully tighten the base bolt.

### CONNECTING POSTS

Extend the belt and slide the belt end onto the receiver spline of the next post

### HINT

Always leave 12" of belt inside the post to allow for play should the belt be pulled or pushed on.

### BELT LOCK

To prevent accidental belt release twist belt lock 90°.
