

FLOOR PROTECTOR

Full Circumference Floor Protector as Standard

QueuePro features the best floor protection in its class, the heavy-duty rubber ring provides full contact floor protection around the circumference of the base and will last the life of the barrier.

QueuePro stanchions offer the durability of steel construction and heavy duty cast iron bases, ideal for high traffic areas such as airports, large retail stores, stadiums and arenas. The 200 model's 2"/50mm diameter post gives slim graceful lines while the sleek look of the 250 model comes from having the belt cassette housed inside the 2.5"/64mm diameter post. The QueuePro 250 is also available in the Xtra version featuring a 50% wider belt making a more visible barrier and giving much greater impact to printed logos and messages.
