

The QueuePro 300 is designed for creating large queue systems where its 16'4.9m belt halves the number of barriers that are needed with the industry standard 7.5'2.3m belt. Fewer barriers lowers total purchase cost and reduces the labor required to set up and take down queue systems. The belt mechanism is housed inside the 3"/75mm diameter post giving the QueuePro 300 a sleek, elegant look and despite the long span the belt won't sag. Made from a heavy duty steel post and a solid cast iron base, the QueuePro 300 will withstand the wear and tear of high traffic areas.

Brake for slow and safe belt retraction

Belt Lock to prevent accidental belt release

Universal belt end connects to all major brands

Steel/Stainless Steel Post

Cast iron base with replaceable cover

Full circumference rubber floor protector
