

RollerPro is the first belt barrier offering the convenience of a roller base at an affordable price. RollerPro is easily moved by tilting the barrier onto its discrete 4.5"/115mm roller and pushing using the post head. The 200 model's 2"/50mm diameter post gives slim graceful lines while the sleek look of the 250 model comes from having the belt cassette housed inside the 2.5"/64mm diameter post. The RollerPro 250 is also available in the Xtra version featuring a 50% wider belt for a more visible barrier and giving much greater impact to logos and printed messages.
