WallMaster Twin
Maximum Access Control

The WallMaster Twin is a wall mounted retracting belt barrier featuring a unique Twin Belt configuration. Two belts increase the visibility of the barrier and restrict pedestrians from ducking under the belt. The single piece construction has a lower cost than two individual wall mounts and is easier to install. The unit's steel housing provides the durability needed for working environments and the compact design will not create an obstruction in restricted spaces such as corridors and doorways. This unit is available in 4 belt lengths and a range of permanent and temporary mounting options.

Mounting Options

Fixed   Removable   Magnetic

Suction Cup   Clamp

Supplied WIth Two Reciever Clips

Belt End Options

Universal   Magnetic   S-Clip   Break away
